

Rega RP6
\$1495 (\$1990 with Exact 2 cartridge)

Rega's RP6 offers the same phenolic-resin "double brace" found in the RP3, the same RB303 arm, and a whole lot more. Replacing Rega's traditional glass platter/felt mat is a two-piece, 16mm-thick flywheel/platter made of two joined pieces of float glass. Moreover, the RP6 comes standard with the TT PSU power supply, a must for top performance. Note the large improvements in dynamic nuance and explosiveness, tonal and textural detail, size and depth of stage, and sheer musicality. Reviewed with Exact 2 mm cartridge at \$1990. WG, 226
